

Is your supply chain optimised?

Metalfin can help

Finished and Semi-finished Components in Stainless Steel and Aluminium

The Metalfin Difference

The experienced and well trained team at Metalfin are waiting to assist you in finding innovative and cost-effective arrangements to meet your technical and delivery requirements.

You will benefit from the unlimited resources, stockholding and purchasing power available to Metalfin as part of Amari Metals, Europe's Market leader in aluminium and stainless stockholding.

Whether you are seeking one-off supply of a semi-finished product from stock, or an on-going JIT Supply Partnership for bespoke components, Metalfin can deliver.

During over 40 years of trading, Metalfin has built a core expertise in the supply of semi-finished components based on exploiting extensive stocks and in-house manufacturing facilities supported by a network of sub-contract specialists. Qualified design engineers and logistics specialists are ready to discuss your requirements all designed to help you remain competitive.

Operating from the West Midlands at the heart of the UK Motorway network, Metalfin occupies an extensive 4 acre site, currently including some 66,000 sq ft of custom-built warehousing. This, combined with on-going investments in stock and processing facilities, means Metalfin is well placed to meet the needs of its customers throughout the UK and across Europe.

Stainless Steel

With many years experience specialising in the supply of stainless steel, Metalfin has built a reputation for quality and reliability with a friendly, flexible service designed around customers' needs.

Whatever your requirements, large or small, wherever you are located, you can rely on Metalfin to deliver.

The comprehensive stock enables a fast and effective service nationwide with next day delivery as standard on the comprehensive range of standard products.

Stainless Steel - Rolled Products

The Metalfin Service Centre facilities provide decoiling of sheet and plate in standard or non-standard lengths as well as blanks of any size with full polishing and protective coating options. Further finishing or pre-fabrication is also available including shaped blanks, notching, piercing, folding, etc.

Stainless Steel – Tube, Pipe, Fittings & Flanges

In response to customer demand, the stock includes an increasing range where you can choose from European or Far East manufactured items.

In addition to extensive stocks, Metalfin has close associations with Europe's major stainless steel manufacturers. This enables you to source specialised tube, pipe and fittings direct from production at competitive prices, alongside processing or pre-fabrication where total cost or quality has become an issue.

Standard Product Range

Stainless steel – plate, sheet, tube, pipe, box section, fittings, flanges, bar, angle, coil, strip, coil radiators, flexible hoses & conduit, dished ends, balustrading and bollard sections.

Aluminium – sheet, plate, bar and extrusions

Copper & Brass – tube and coil/strip

Titanium Tube

Friendly, flexible, efficient and fast service on the massive range of ex-stock items, with next day delivery as standard.

Processing & Manufacturing Facilities

Combining extensive in-house equipment with a network of approved sub-contract specialists ensures you of cost-effective component manufacturing, including:

- Decoiling of Sheet & Plate to bespoke Blanks
- Bar, Tube & Pipe Cutting
- Polishing and Protective Coating in-house
- Anodising & Colour Anodising
- Perforating, Bending, Machining, Threading, Coiling
- Powder Coating

Aluminium Extrusions

Innovative use of standard and bespoke aluminium extrusions can provide highly cost-effective manufacturing route to many product designs and manufacturing challenges.

With Metalfin as your supply partner you can be sure of the optimum sourcing and pre-fabrication processing – Utilising an international network of extrusion suppliers, including a sourcing office in the Far East, combined with our in-house manufacturing facilities plus a network of sub-contract finishing specialists.

Metalfin supports your drive for lean manufacturing by providing finished components to your exact JIT requirements whether as individual items, kits or sub-assemblies.

Bespoke Solutions – Whatever your Industry

To remain competitive in today's global markets businesses must constantly review their supply chain and manufacturing processes, continuously seeking innovative ways to cut costs and improve efficiency.

For many years Metalfin has been helping manufacturing businesses, including large OEMs, to achieve these objectives. Many of the customers are blue chip household names – They are hard task masters, so demand and receive service second to none.

You too could access the benefits of this service.
